

HORACIO RAMIREZ

Solutions Architect · UX Engineer

horacio@monocromatico.com.mx

SUMMARY

Solutions Architect and UX Engineer with 15+ years designing, architecting, and delivering scalable web platforms. I bridge technical complexity and user experience: leading cross-functional teams, owning delivery from architecture through deployment, and working directly with clients and stakeholders. A background in graphic and UI/UX design shapes my approach to building intuitive, high-performance, user-centric systems.

EXPERIENCE

Solutions Architect & Web Developer

monocromatico ~ Mexico City, MX (Freelance)

October 2008 – Present

Deliver end-to-end web solutions for clients across industries, combining UI/UX design, architecture, full-stack development, and CI/CD deployment.

- Adopted spec-driven agentic development workflows for web projects, authoring detailed technical specifications and orchestrating AI coding agents to accelerate delivery while maintaining architecture and code quality standards.
- Analyzed and implemented AI-powered workflow automation for administrative, IT, and logistics processes, reducing manual effort for client operations.
- Migrated and upgraded multiple Drupal platforms with zero data loss and measurable performance gains.
- Designed and deployed CI/CD pipelines and cloud infrastructure (AWS, Azure, Linux VPS) for scalability and cost efficiency.
- Built and optimized e-commerce platforms and digital marketing solutions that drove client revenue growth.
- Advise non-technical business owners, translating business requirements into actionable technical roadmaps.

UI Development Lead / Tech Lead

Indegene (HQ: Bengaluru, IN / Princeton, US) ~ Remote, Mexico City, MX

May 2022 – February 2025

Led UI development for enterprise Drupal projects, collaborating with globally distributed cross-functional teams to deliver scalable, responsive interfaces.

- Led UI delivery for 30+ pharmaceutical product sites for healthcare professionals (HCP) and patients (DTC) for Amgen and Incyte, ensuring regulatory compliance and brand consistency.
- Enforced WCAG accessibility and performance standards across all deliverables.
- Conducted code reviews and mentored junior and mid-level developers, raising overall code quality.
- Evaluated emerging front-end technologies and drove their adoption where they added value.

Tech Lead, Web UX/UI & Development

Gonet Mexico (Orion Innovation) ~ Mexico City, MX

January 2019 – May 2022

Defined strategies for complex technical, creative, and usability challenges, partnering with UI/UX and development teams on enterprise accounts.

- Architected and launched starbucks.com.mx, a decoupled Drupal + React/Next.js corporate multi-site serving Mexico, Argentina, Uruguay, Paraguay, Colombia, and Chile.
- Led development of Starbucks Rewards web platforms for Mexico (rewards.starbucks.com.mx) and Chile (rewards.starbucks.cl).
- Provided technical leadership for Grupo Salinas BAZ super-app, coordinating integration and delivery with 500+ stakeholders.
- Mentored junior team members and strengthened team capabilities.

Sr. UX/UI Designer & Sr. Drupal Engineer

Gonet Mexico ~ Mexico City, MX

January 2017 – January 2019

Delivered design and front-end solutions for key accounts including Pfizer, Aeromexico, and Starbucks LATAM.

- Built multiple internal systems for Aeromexico, including a vendor and intranet platform serving 10,000+ internal users and external vendors.
- Conducted UX research, prototyping, and system architecture design, directly influencing product direction and usability.
- Developed and maintained high-performance Drupal web platforms.

Full Stack Developer

Gonet Mexico ~ Mexico City, MX

October 2015 – January 2017

Built and maintained 20+ responsive Drupal websites within the Pfizer LATAM ecosystem, focusing on performance, security, and best practices.

Designer & Front-End Drupal Developer

Sensis Agency (HQ: Los Angeles, US) ~ Remote, Mexico City, MX
December 2012 – October 2015

Worked on agile teams deploying and maintaining Drupal sites for clients including LA Care, UnitedHealthcare, and San Diego Gas & Electric.

Full Stack Developer & Designer

Mayday Global Solutions (HQ: Montreal, CA) ~ Remote, Monterrey, MX
December 2009 – October 2012

Sole developer and designer for a multi-tenant business networking platform serving the Montreal Chamber of Commerce and its SMB members, owning the full cycle from visual design to implementation and deployment.

- Designed and built 100+ custom Drupal subthemes for member business sites across diverse industries, balancing per-client branding with a maintainable shared codebase.

EDUCATION

B.A. in Graphic Design — Universidad de Guanajuato, Mexico (2009)

LANGUAGES

Spanish (native) · English (fluent, C1)

SKILLS & TOOLS

- Solutions Architecture: System design & integration, scalable web architectures, microservices & decoupled architectures, technical consulting, requirements elicitation.
- Cloud & DevOps: AWS, Azure, Linode; CI/CD with GitHub Actions, GitLab CI, Azure DevOps, AWS CodePipeline.
- Front-End: HTML, CSS/SASS, JavaScript, React, Next.js, Angular, Vue, jQuery.
- Back-End: Drupal (6–11), PHP, Symfony, Laravel, .NET, Django, Ruby on Rails.
- UI/UX Design: UX strategy, prototyping, wireframing, user research, information architecture, interaction design (Figma, Adobe XD, Sketch).
- Quality & Performance: Performance optimization, web accessibility (WCAG, WAI-ARIA), security best practices.
- Leadership: Agile methodologies, team leadership, mentoring (Jira, Trello).
- Analytics: Google Analytics, Google Tag Manager, GoatCounter.
- AI-Assisted Development: Spec-driven agentic development, AI agent orchestration (Claude Code, Cursor, Copilot, ChatGPT, Gemini).
